Education

Gwinnet Technical College, Lawrenceville, Georgia

August 2018 to June 2021

Diploma in Computer Programming

Projects

Live Twitch Chat Fetcher

- Developed a program that would catch any incoming chats from a Twitch chat room and display on a monitor in Minecraft live, giving a more engaging experience used by many streamers.
- Developed skills in Lua, Python and gained a grasp on web sockets and web socket servers.

PhotoLink

- Built a social networking website that links models and people interested in booking photo shoots with photographers.
- Honed my skills in HTML, CSS and JavaScript

Binary Number converter

- Created a program that takes user input in binary or float and converts the input to the opposite type.
- Used C++ and gained a good understanding of binary

Relevant Skills

Languages: Java, C++, Python, HTML, CSS, JavaScript, SQL

Tools: Eclipse, Visual Studios, GitHub

Courses: Full Stack Web Development, Object Oriented Programming

Employment

Brand Vaughan Lumber Co — Madison, GA

Striker, September 2019 to June 2020

- Worked with a team to fulfill customer orders on a tight deadline.
- Helped to boost sales by 50%, achieving the best sales month in company history.
- Introduced new measures for increasing work efficiency, like instituting new yard and warehouse layouts and performed detailed forklift maintenance.

Cleveland Electric — Atlanta, GA

First Year Electrical Apprentice, 2018 to 2019

- Collaborated and distributed workloads among 50 people to run electrical circuits through commercial buildings.
- Provided material, completed complex tasks and kept people up to date on project requirements speeding up production by approximately 17%, saving thousands of dollars and countless hours in company time and money.
